

MEPS Lean Construction

Mechanical, Electrical, Plumbing, Sheetmetal, and Sprinkler Fitters

MEPS Lean Construction Training Program

(Online- Zoom)

Local 393 is proud to invite you to a cross functional MEPS Lean Construction Education Training Program. The course consists of six Zoom - Live stream online sessions that will entail lecture, discussion, interactive simulations, and experiential training.

Classes: Tuesdays and Thursdays - 5:00pm - 8:00pm via Zoom online
11/03, 11/05, 11/12, 11/17, 11/19, and 11/24

Participants will learn:

- What is Lean in the construction industry?
- Why is Lean important in construction?
- How is Lean process optimization can be implemented on the jobsite?
- What is a Push versus Pull system?
- What is Lean work structuring and how to execute it?
- How to develop and execute a Last Planner System –including milestone planning, pull phase planning, weekly work planning, and daily huddles.
- How to use lean tools and techniques (eg. A3s, prefabrication).

Participants will earn: A 25-hour certificate in MEPS Lean Planning & Design. Participants have the option to also earn an AGC Lean Certificate.

Instructors:

Erica Paul - CM-Lean, MBA, JD
Local 393 Development/Instructors

Andreas Phelps – Ph.D.
Lean Leader – XL Construction

General Contractor Sponsor: XL Construction

Registration is open to the following:

- ❖ **Union members** of the mechanical, electrical, plumbing, sheet metal, or fire sprinklers Journeyman level or above.
